

## **Immunization Services for Dominican Republic Travel:**

- **Do we need to get vaccinations?**

Hepatitis A and Tetanus are not required but are recommended. If you have not had these vaccinations, you should get them. NOTE: They should be taken at least 30 days prior to travel. Hepatitis A vaccine is good for 1 year. If you get a booster in 1 year then you're then safe for 20 years. Tetanus immunizations are good for 10 years. However, they may not be available due to shortages.

- **Where do I go to get vaccinations? At your local county health department:**
